

## Phytoplankton abundance:

$1.3 \times 10^3$  cells ml<sup>-1</sup>

## Phytoplankton groups percentage:

flagellates: 55.1%, diatoms: 35.0%,  
coccolithophores: 8.1%, dinoflagellates: 1.9%

## Most abundant diatom species:

*Chaetoceros socialis* (6.7%)

*Chaetoceros curvisetus* (4.4%)

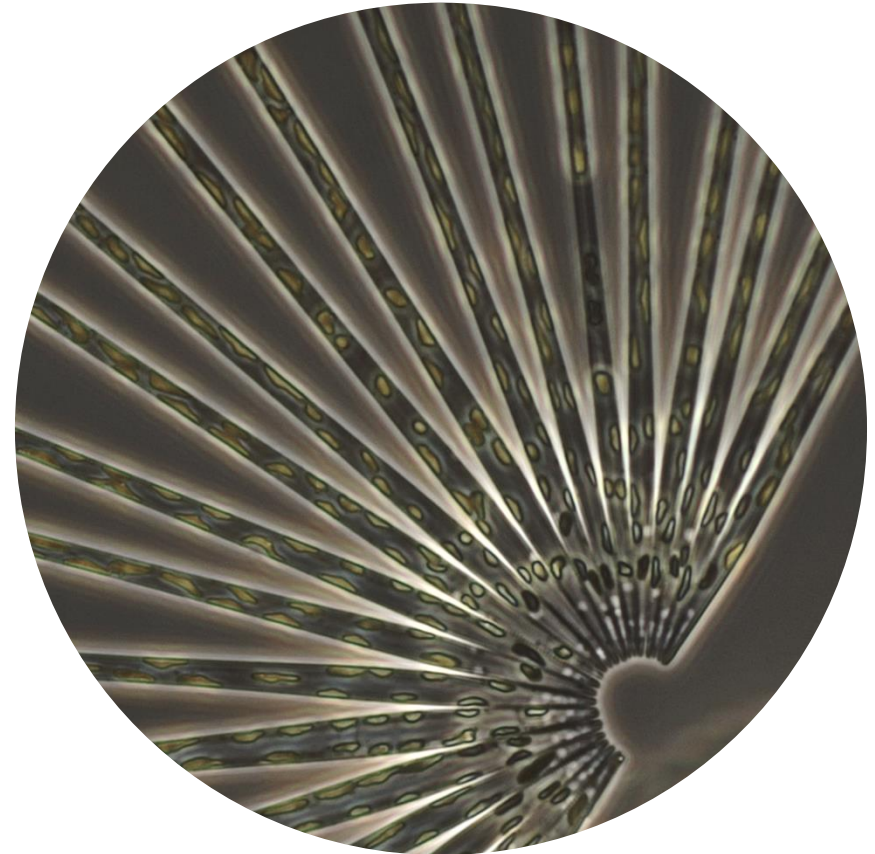

## Most abundant species in the net sample:

*Chaetoceros costatus*

*Chaetoceros curvisetus*

*Thalassiosira rotula*

## NOTES:

*Live sample*

*Main species in the picture: Lioloma pacificum*
