

### Phytoplankton abundance:

$2.3 \times 10^4$  cells ml<sup>-1</sup>

### Phytoplankton groups percentage:

flagellates: 59.2%, diatoms: 40.0%,  
dinoflagellates: 0.8%, coccolithophores: 0.0%

### Most abundant taxa:

*Chaetoceros tenuissimus* (12.9%)

*Chaetoceros thronsenii* (9.7%)

### Most abundant species in the net sample:

*Pseudo-nitzschia pseudodelicatissima*

*Protoperidinium diabolus*

*Dinophysis sacculus*

### NOTES:

### Live sample

Main species in the picture: *Protoperidinium diabolus* and  
*Dinophysis caudata*
