

## MC 1083

04/12/2013

### Phytoplankton abundance:

$5,4 \times 10^2$  cells ml<sup>-1</sup>

### Phytoplankton groups percentage:

flagellates: 52%, diatoms: 32%,  
coccolithophores: 10%, dinoflagellates: 6,0%

### Most abundant diatom species:

*Chaetoceros socialis* (12,5%)  
*Asterionellopsis glacialis* (3,7%)

### Most abundant species in net sample:

*Chaetoceros costatus*  
*Chaetoceros socialis*  
*Thalassiosira rotula*

Live sample

Notes: preliminary quantitative analysis
