

### Phytoplankton abundance:

$6.4 \times 10^3$  cells ml<sup>-1</sup>

### Phytoplankton groups percentage:

flagellates: 66.6%, diatoms: 25.9%,  
dinoflagellates: 5.1%, coccolithophores: 2.4%

### Most abundant taxa:

*Leptocylindrus danicus* (5.5%)

*Chaetoceros tenuissimus* (5.0%)

### Most abundant species in the net sample:

*Chaetoceros affinis*

*Leptocylindrus danicus*

### NOTES:

**Live sample**

*Main species in the picture: Dinophysys caudata*
